

# TRIANGLES BY BRANEGAMES

This is a strategy game for 2 players which takes about 30 minutes to play. To play the game you will need 2 felt tipped pens or highlighters, a colour for each player. The first player colours over one side of a small triangle anywhere on the design below. The second player does likewise and may colour a line which touches the first player's line, or which is separate from the first player's line. The first player now colours another line: this line must start from the first line. A player's lines must all connect together. Play continues in this way. Each time a player manages to colour all three sides of a small triangle that triangle is coloured in with the player's colour to show possession. The game ends when either player has no valid move available. The winner is the player who has coloured in the most triangles.
